Academic Excellence

Bolstering future professionals, the University of Maryland Center for Health and Homeland Security (CHHS) is at the forefront of groundbreaking crisis management, public health, cybersecurity, and homeland security education. CHHS Founder and Director Michael Greenberger, along with staffers applying their industry expertise, have developed unique courses and specializations at the University of Maryland

Francis King Carey School of Law. Through our academic coursework and externships, as well as career opportunities upon graduation, CHHS is able to offer students a window into fields that increasingly require expert knowledge.

Coursework

- Homeland Security and the Law of Counterterrorism (inaugural course 2002)
- Law and Policy of Emergency Public Health Response (inaugural course 2010)
- Law and Policy of Cybersecurity (inaugural course 2012)
- Law and Policy of Crisis Management (inaugural course 2013)
- National Security, Foreign Intelligence, and Privacy (inaugural course 2014)
- Law and Policy of Cyber Crimes (inaugural class fall 2016)
- Master of Laws – Crisis Management and Cybersecurity Specializations (inaugural class fall 2015)
- Master of Science in Law – Crisis Management and Cybersecurity Specializations (inaugural class fall 2015)

Hands-on Experience

Each semester, the Center offers an academic Externship, and employs students as Research Assistants – both opportunities to gain hands-on experience while learning from experts in the field. Externs from Maryland Carey Law earn credit towards their degree while addressing cutting-edge issues relating to emergency response, counterterrorism, cyber threats, and public health crisis management. Research Assistants employed by the Center have the opportunity to expand their knowledge by engaging in research that supports a wide array of staff projects ranging from exercise planning to policy development, to government consulting, and legal analysis.

Professional Positions

In addition to our academic initiatives, the Center is a resource for recent graduates with an interest in homeland security, cybersecurity, crisis management, and/or public health-related occupations. Many CHHS employees are also law school graduates, continuing the Center's commitment to advancing the legal field both academically and professionally.
